

Société belge d'infectiologie et de microbiologie clinique

Belgische vereniging voor infectiologie en klinische microbiologie

SYMPOSIUM 5th May 2020.

CALL FOR ABSTRACT

Dear attendee,

We are pleased to inform you that our next all day symposium will be organised on Tuesday 5th May 2020 in the congress rooms of the Royal Library of Brussels. It will be dedicated to the subject of “**Lower respiratory tract infections revisited**”. The preliminary program is included hereby.

During the meeting, an oral presentation session and a poster session will be organised. Therefore, we are looking forward to receiving abstracts for clinical and laboratory case reports on the above mentioned topic.

These interactive sessions are particularly open to young scientists, trainees and lab technicians.

The best two selected abstracts in each session (clinical/lab) will be selected for interactive oral presentation. We will ask to include questions that can be submitted to a voting system.

May we ask you to send us the abstracts using the following specifications:

- 1900 characters limit – (spaces are not counted) including title, authors, text
- Using a 11 character Times New Roman font
- Using a .word document

Abstracts should be sent to SBIMC-BVIKM by email to elise.brisart@erasme.ulb.ac.be for **30th March 2020 at the latest**. Notices will be made in April by email to the presenter/contact person.

Thanking you in advance for your collaboration, we remain

Yours faithfully,

SBIMC-BVIKM
